

Year 6

by Elizabeth

**25th
January**

In Year Six this week, we have been learning more about Twisted Traditional Tales and have been working on writing our own versions. We choose which story we would like to twist and how we could change the story to make it funny, scary or just DIFFERENT!

For Maths, we have been learning about Scale Factors, Ratio and Proportion. We have altered shapes by making them larger or smaller, adapted recipes for different numbers of people and learned how to use diagrams to solve complicated reasoning questions.
