

ENGLISH

In English this week year 5 have been looking at explanation texts. On Tuesday we were looking to see if all the features were in the explanation text we had chosen. Then on Wednesday, we used information books and iPads to find out as much as possible about the water cycle. We were finding out about the water cycle because we were planning for our information text we were going to write. On Thursday we did our big write about an adventure in India, this was fun! Finally, on Friday we did another plan for our explanation texts. In this plan we decided our layout and the information we were going to put into our work.

Four Lanes Junior School is a kind school where children go to learn about extremely fun topics. In year 5 at the moment we are learning about explanation texts in English and about force in Science as well as mirror images in Maths. I love doing the mirror images because the reflection looks so cool, and when you plot it - the image you have drawn looks exactly like the original one!

This week in DT we are cutting the wood to build our bridges and try to make them sturdy enough.
