

Week:
22nd April
2019

This week in English we've been watching short clips and we wrote down what happened in the clips. In another session we watched a new short clip and we wrote down information about what was happening and how the characters were feeling. The session after we made a graphic novel about the clip we watched and what we needed to include were: thought bubbles, onomatopoeia, drawings, a metaphor and time shift captions.

This week in PHSEE we have been talking about embarrassment and what you would feel like if you got embarrassed. We got a sheet of paper of a person and we had to decorate it to show what that person was feeling if they had been laughed at or embarrassed. By Annie (5BI)

In Maths, we learnt how to multiply unit fractions by whole numbers.

We used bar model to help us multiply fractions by whole numbers

This is what we did: $4 \times \frac{2}{7}$ - First you would draw the bar model and as the denominator is 7, then divide the bar into seven equal sections. You would draw 4 bar models of 7 sections then you colour 2 of them on each then you would add the sections together. It would equal $\frac{8}{7}$ or 1 and $\frac{1}{7}$.

We wonder what exciting stuff next term will bring!

Egyptians

This week in topic we made amulets out of salt dough.
